RALEIGH, N. C., October 23 .- (Special.)

The State Commissioner of Labor is

rapidly receiving reports from different

classes of people, and to-day made up

those from farmers. He says that 82

per cent. of these declare in favor of com-

pulsery education. They report that there

was more profit in crops this year than

in many years past. Crops were made

far more cheaply than usual. This was

largely due to the fact that owing to the

failure of crops last year the farmers worked last spring harder than ever, and

economized in all possible ways. The rush to get wood is so great that

the country is being ransacked for it. Wood along the lines of the railways is

in great demand. Last year was an un-usually cool one, and much had to be done to prevent the poor from suffering.

Slow healing sores are unsightly, painful and dangerous. They are a constant care and source of anxiety and worry. Chronic, slow healing sores are fre-

quently the after effects of some long debilitating sickness that leaves the constitution weakened and the blood in a polluted, run down condition, when a scratch, cut, simple boil or bruise, becomes a fearful looking ulcer that grows and spreads, eating deeper and deeper into the flesh in spite of everything that can be done to check its progress. Old people whose blood is below the standard and the circulation sluggish, are often

tormented with face sores, and indolent, sickly looking ulcers upon the limbs that give them hardly a moment's rest from ordinary sores Purify the Blood

when the blood is too weak to throw off the germs and poisons, and no amount of external treatment will heal them, but they continue

to grow worse and worse, and many times terminate in that most horrible of all human maladies, Cancer. S. S. S. cures slow healing sores by burifying and invigorating the germ-laden, vitiated blood and purging the system of all corrupt matter, thus strik-ing at the real cause and removing every

hindrance to a rapid cure, and this is the only possible way to reach these deeply dangerous places. S. S. rooted,
